ENTERPRISE IT SERVICES

Intelligent Power Device Monitoring

Powered by EcoStruxure IT Expert

Premier Managed Services for Critical Infrastructure

Sourcepass offers proactive fault and performance monitoring for critical IT infrastructure, ensuring 24/7/365 protection. By integrating EcoStruxure IT Expert for Schneider APC devices, our managed service provides advanced device assessments, lifecycle insights, firmware upgrades, and detailed sensor monitoring, including temperature, humidity, battery load, and health diagnostics.

Through expert analysis and semi-annual health assessments, we identify vulnerabilities, optimize device performance, and mitigate risks before they impact operations.

Why Sourcepass Enterprise?

Proactive Monitoring and Protection

Sourcepass provides 24/7/365 proactive fault and performance monitoring, ensuring continuous protection and stability for critical IT infrastructure.

Advanced Device Management

Sourcepass offers advanced device assessments, lifecycle insights, firmware upgrades, and detailed sensor monitoring, including temperature, humidity, battery load, and health diagnostics.

Risk Mitigation and Optimization

Sourcepass identifies vulnerabilities, optimizes device performance, and mitigates risks before they impact operations.

Our Services

Extend your in-house team, reducing the need for costly internal resources while ensuring continuous uptime and stability. With EcoStruxure IT Expert, we provide 24/7 infrastructure visibility and proactive incident management.

Empower IT teams with:
- Real-time visibility
- Actionable insights
- Seamless integration
- Advanced monitoring and health reports via EcoStruxure IT Expert

Strengthen network power protection and infrastructure resilience:
Maintain a secure and reliable environment with remote firmware updates, UPS health assessments, and benchmarking tools – all delivered through EcoStruxure's platform.

Secure IoT with intelligent power device monitoring
