

SOURCEPASS ENTERPRISE

# Enterprise Managed Services

## Co-Managed IT for Mission-Critical, Regulated Organizations

### Modernize. Protect. Scale.

Sourcepass Enterprise delivers advanced co-managed IT, cybersecurity, and infrastructure services for organizations with complex environments, regulatory obligations, and in-house IT teams.

We partner directly with enterprise technology leaders to provide 24x7 operational coverage, deep technical expertise, and strategic guidance—without replacing your internal team.

### Designed for Enterprise IT Leaders

Sourcepass Enterprise is purpose-built for organizations that operate in high-stakes, highly regulated environments where downtime, security gaps, or misalignment carry real consequences.

We empower CIOs, CISOs, and senior IT leaders to modernize infrastructure, reduce risk, and scale with confidence—while maintaining full visibility and control.

### A Strategic Co-Managed IT Partnership

**We don't outsource responsibility.**

**We extend your capabilities.**

Sourcepass Enterprise augments internal IT teams through expert-led co-managed services that deliver enterprise-grade resilience and execution.

With national reach and a localized delivery model, we support enterprise environments at scale—without sacrificing responsiveness.

### Core Enterprise Services

- Co-Managed IT Services
- Network Operations Center (NOC)
- Security Operations Center (SOC)
- Enterprise Cybersecurity Services
- Professional Services
- Infrastructure Services
- Digital Transformation
- Cloud Integration

### What Makes Us Different

### Perfect for Orgs That:

- Require 24x7x365 support
- Prefer co-managed IT partnerships over fully outsourced models
- Operate under strict regulatory frameworks (NIST CSF, NYDFS, HIPAA, PCI-DSS, SEC, FERPA)

# Enterprise Managed Services

Co-Managed IT for Mission-Critical, Regulated Organizations

## Key Enterprise Services

### Co-Managed IT

Strategic augmentation of internal IT teams with vCIO leadership, automation expertise, and seamless 24x7 collaboration across NOC and SOC operations.

### Network Operations Center (NOC)

End-to-end infrastructure oversight including fault and root-cause analysis, performance optimization, AI-driven observability, and secure change and configuration management.

### Security Operations Center (SOC)

Always-on protection with Managed Detection and Response (MDR), Endpoint Detection and Response (EDR), vulnerability management, breach detection, threat intelligence, and managed firewall services.

### Enterprise-Level Cybersecurity

Compliance advisory, risk assessments, advanced threat protection, incident response, forensics, tabletop exercises, and cyber resilience planning.

### Professional & Infrastructure Services

Enterprise networking, SD-WAN, data center migrations, virtualization, power systems, and physical security solutions designed for mission-critical operations.

### Cloud Integration & Digital Transformation

Secure cloud migrations, Microsoft 365 and Azure integrations, IoT enablement, identity and access management, SASE, and Zero Trust Network Access (ZTNA).

## Why Sourcepass?

- National reach with flexible remote and on-site delivery
- SOC 2 Type II and ISO 27001 certified operations
- 97%+ CSAT across enterprise and government clients
- Proven execution in regulated and large-scale environments
- Full transparency through our Quest® platform for tickets, projects, and performance
