Key Services

Cybersecurity Risk Assessment & Advisory: Our comprehensive risk management services provide essential cybersecurity governance, risk, and compliance recommendations to protect from threats and strengthen your security posture.

Business Continuity / Business Impact Analysis: Sourcepass GOV documents and tests business continuity plans, including impact analysis to provide seamless operations during disruptions, safeguarding critical functions.

Disaster Recovery Planning: Sourcepass GOV crafts disaster recovery plans to ensure swift recovery from disruptions, safeguarding critical operations and minimizing downtime.

Cybersecurity Tabletop Exercises: Sourcepass GOV simulates cybersecurity attacks to rigorously test your incident response plan, identifying weaknesses and recommending measures to enhance security.

Dedicated vCISO: A dedicated vCISO offers tailored consulting to provide strategic direction, oversee cybersecurity risk management, ensure regulatory compliance, recommend best practices, and update policies and procedures.

Governance & Reporting: Our risk management services establish governance frameworks to oversee cybersecurity, providing effective communication across all organizational levels with regular reporting to track progress and identify areas for improvement.

Compliance Oversight: Our expert compliance oversight service includes thorough audits, continuous monitoring, and tailored recommendations to help you meet industry standards and regulations.

Policies, Plans, & Procedures: Sourcepass GOV reviews and updates documentation to ensure proper governance and compliance with current standards and regulations.

AI Readiness Risk Assessment with Advisory

- Identify risks related to AI data security, privacy, and accountability.
- Assess AI third-party software risks and prioritize based on likelihood, impact, and organizational risk tolerance.
- Develop strategies to mitigate, transfer, avoid, or accept AI risks.
- Create responses to security incidents
- Ensure policies, processes, and procedures address AI risk.
- Ensure contingency processes address 3rd party data or high-risk AI systems
