

CYBERSECURITY SERVICES

ThreatProtect

Real-Time Cybersecurity Available 24x7x365

Identify, Protect, Detect, Respond, & Recover

Closely aligned with the Department of Commerce National Institute of Standards and Technology's (NIST) Cybersecurity Framework and industry standards, ThreatProtect is a suite of services designed to identify, protect, detect, respond, and recover from cyber threats, ensuring comprehensive security and safeguarding your digital assets.

By aligning ThreatProtect to the NIST framework, Sourcepass GOV helps to address IT and security functions outlined in many applicable security standards, from FERPA to CMMC.

Why Choose Sourcepass GOV?

- ✓ **Comprehensive Protection:** Real-time threat protection and rapid response capabilities, closely aligned with NIST Cybersecurity Framework and industry standards.
- ✓ **Highly Experienced Security Engineers:** We have 40+ years of experience in assisting SLED, law enforcement, private and charter schools, and government agencies.
- ✓ **Governmental Contracts:** All Sourcepass GOV services are available on GSA, NYS contracts, and BOCES LAN / WAN Service contracts.
- ✓ **Flexible Plans:** Different cybersecurity service bundles and custom packages are available to meet your unique needs.

Our Services Include:

- **Managed Security Operations:** Endpoint monitoring, network monitoring, alerting, & response
- **Cyber Intelligence:** Real-time, automated protection against cyber threats, ensuring uninterrupted operations and safeguarding data
- **Breach Detection:** Identification & response to security breaches, minimizing damage and ensuring continuity
- **Unified Threat Management (UTM) for Firewalls:** Integrates various security functions—such as antivirus, intrusion detection, and content filtering—into one comprehensive solution
