

IT Scorecards

Gain Clarity on the Health of Your IT Environment

Baseline Your IT & Security

Our Pre-Engagement IT & Security Scorecard is a fast, informal, yet insightful analysis conducted by our expert solution consultant team. We'll identify strengths, gaps, risks, and an initial set of recommended actionable priorities.

Let's review two core areas that are critical to your organization's success:

Security

Complete a high-level review of your organization's cybersecurity profile, examining your overall security posture and your ability to proactively prevent and reactively respond to incidents.

IT Operations & Business Continuity

We gather key information about your core technology solutions, employee satisfaction and productivity with IT, current IT operations or partners, and technology spend. This enables our scorecard to distill the complexity of your IT landscape and outline a clear framework for your technology roadmap.

Key Deliverables

Complete Scorecard

A clear, simplified snapshot of your organization's position in IT & cybersecurity

Challenge & Goal Summary

A concise overview of key focus areas to address and plan for.

Recommended Solutions

Actionable recommendations and guidance on how to move forward

Scorecard Benefits

- No cost, no commitment
- Minimal effort to gain an external, expert perspective
- Tailored to your business, industry, and strategic goals
- Clear guidance on where and how to begin
- Identifies hidden risks before they become emergencies
- Actionable, business-aligned recommendations
