

Managed Security Services

Proactive protection and expert management to keep your business secure and resilient.

Protect Your Business from Every Angle

Cyberattacks are growing more sophisticated, and small to mid-sized businesses are increasingly being targeted.

Without the right protection, one breach can disrupt operations, damage trust, and cost your organization time and money.

Sourcepass Managed Security Services deliver proactive, expert-led protection across your entire IT environment—reducing risk, improving compliance, and keeping your business resilient.

Our team of U.S.-based security professionals provides 24/7 visibility, monitoring, and response so you can focus on growth while we defend your business.

The Sourcepass Advantage

Our team of U.S.-based security professionals provides 24/7 visibility, monitoring, and response so you can focus on growth while we defend your business.

- **Continuous Protection:** 24/7 monitoring and response from our U.S.-based SOC.
- **Comprehensive Coverage:** A multi-layered defense strategy spanning people, process, and technology.
- **Strategic Partnership:** Guidance aligned with business goals and compliance frameworks.
- **Proven Expertise:** Certified security professionals using best-in-class tools and practices.

The Outcome

Partnering with Sourcepass transforms cybersecurity from a reactive burden into a proactive advantage. You gain visibility, compliance confidence, and peace of mind knowing your business is protected by experts who care about your success.

Managed Security Services

Core Services

Security Assessments

Gain a clear understanding of your cybersecurity posture with assessments aligned to CIS and NIST standards. We identify vulnerabilities, prioritize remediation, and deliver a roadmap to resilience.

Managed Cybersecurity Services

End-to-end protection backed by 24/7 monitoring, automated threat response, and compliance support—all managed by Sourcepass security experts.

SIEM (Security Information & Event Management)

Collect, correlate, and analyze event data across your IT environment for real-time visibility, compliance reporting, and forensic investigations.

MDR (Managed Detection & Response)

Detect and respond to threats faster with around-the-clock monitoring, proactive threat hunting, and incident response powered by advanced automation and expert analysts.

Endpoint Security

AI-driven protection that stops malware, ransomware, and fileless attacks on laptops, workstations, and mobile devices—keeping endpoints secure wherever users connect.

Firewall & Network Monitoring

Safeguard your perimeter with managed firewall services using Cisco Meraki and SonicWall. Our team ensures 24/7 network visibility, performance management, and security patching.

Risk & Compliance Services

Meet and maintain compliance with frameworks like HIPAA, NIST, and CIS. Our advisors help manage third-party risk, develop security policies, and ensure regulatory alignment.

SOC Services

Rely on our U.S.-based Security Operations Center for continuous monitoring, investigation, and rapid response to potential threats across your environment.

Vulnerability Detection & Management

Identify and address weaknesses before attackers can exploit them. Monthly scans, prioritized remediation, and expert guidance help maintain a secure posture.

Security Awareness Training

Build a human firewall with interactive employee training and phishing simulations designed to reduce risky behavior and strengthen organizational awareness.

Email Security & Phishing Protection

Defend your inbox from malicious emails with intelligent filters and advanced anti-phishing controls that detect and block harmful content before it reaches users
