

# Tech Stack Alignment with Enhanced Security

**SOC 2  
TYPE II  
CERTIFIED**

## Introduction

Way Finders is an affordable housing organization dedicated to bringing home stability to people across Western Massachusetts since 1972. It works to strengthen housing stability and economic mobility, and to build thriving neighborhoods in communities throughout Western Massachusetts. Way Finders offers critical services such as emergency financial housing assistance, support for renters, and help for those facing foreclosure. It also empowers individuals to reach their goals for employment, economic mobility, and homeownership.

## Challenge

Maintaining an IT environment that supports efficiency, scalability, security, and overall system performance is an important business goal for Way Finders. To achieve this goal, Way Finders wanted to enhance its IT infrastructure by adopting modern solutions that offer robust security features, streamlined management, and scalable capabilities. Specifically, it was looking for:

- Improved Stability
- Enhanced Security
- Redundancy to minimize downtime

## Our Approach

Sourcepass has extensive expertise in performing network refreshes and implementing high-availability (HA) to enhance network stability, redundancy, and security. Our expertise aims to keep critical systems operational even during hardware failures, minimizing downtime and protecting valuable data. By leveraging advanced technologies and best practices, we create resilient IT environments that support long-term business goals, providing our clients with reliable and secure network solutions tailored to their specific needs.

# Solution

Sourcepass had the perfect solution for Way Finders that would enhance security, improve overall network performance, simplify management, and provide scalability for its long-term business goals. To enhance Way Finder's IT environment, Sourcepass's solution included:

**Network Refresh:** Sourcepass replaced aging wireless access points, switches, and network firewalls with advanced solutions that provide enhanced security features and more robust network management capabilities.

**High Availability:** The network refresh promotes high availability to minimize downtime and protect against data loss with continuous access to critical applications.

“

We are happy with the work that Sourcepass performed to refresh our network infrastructure, replacing outdated systems with advanced solutions that improved our operations. It has helped my team save time and focus more on strategic initiatives.

*- Kevin Brassard, Senior Vice President, Information Technology*

”

## Conclusion

Modern technology aims to drive innovation, enhance efficiency, and stay competitive in an ever-evolving market. Way Finders is just one example of a forward-thinking business that embraces the future.

With the help of Sourcepass, Way Finders now has a refreshed IT environment that supports efficiency, scalability, security, and overall system performance. This transformation supports Way Finders' long-term business goals and ensures reliable, uninterrupted service.
